ACCESSORIES 96

A young girl with blonde hair, wearing a white, tiered, sleeveless dress, stands in a grassy park. Her arms are raised high in the air, and she is looking upwards with a joyful expression. Numerous light-colored, elongated leaves or petals are captured in mid-air around her, as if she has just tossed them. The background is filled with lush green trees and foliage, bathed in the warm, golden light of late afternoon or early morning. The overall mood is one of pure happiness and connection with nature.

TRUE BEAUTY COMES FROM
NATURE

ABOUT RONDO

The beginning of Rondo Polska dates back to 1989. Since that time it has been a family company. A constant struggle for perfection, hard work and gaining new experience helped to turn a small workshop into a company manufacturing furniture and garden accessories with a very strong position in Europe. At first it focused on metal products; after several years of work and new skills it started to design and manufacture garden furniture.

The co-owners of the company are father and his son – Waldemar and Marcin who confront the traditional with the modern to create a cohesive whole. Our management is based on such values as honesty, reliability, and respect for others. We believe that the quality of the product is of central importance and we do our best so that our furniture is practical, beautiful and durable.

„I have simple taste. I like the best.” Oscar Wilde

We have full control of our production process. All stages take place in our plants. We produce the furniture from scratch. We have two production plants equipped with modern technology. The first produces metal elements, the other ready furniture. Our seat is in a Polish town, surrounded by beautiful forests, called Wołów.

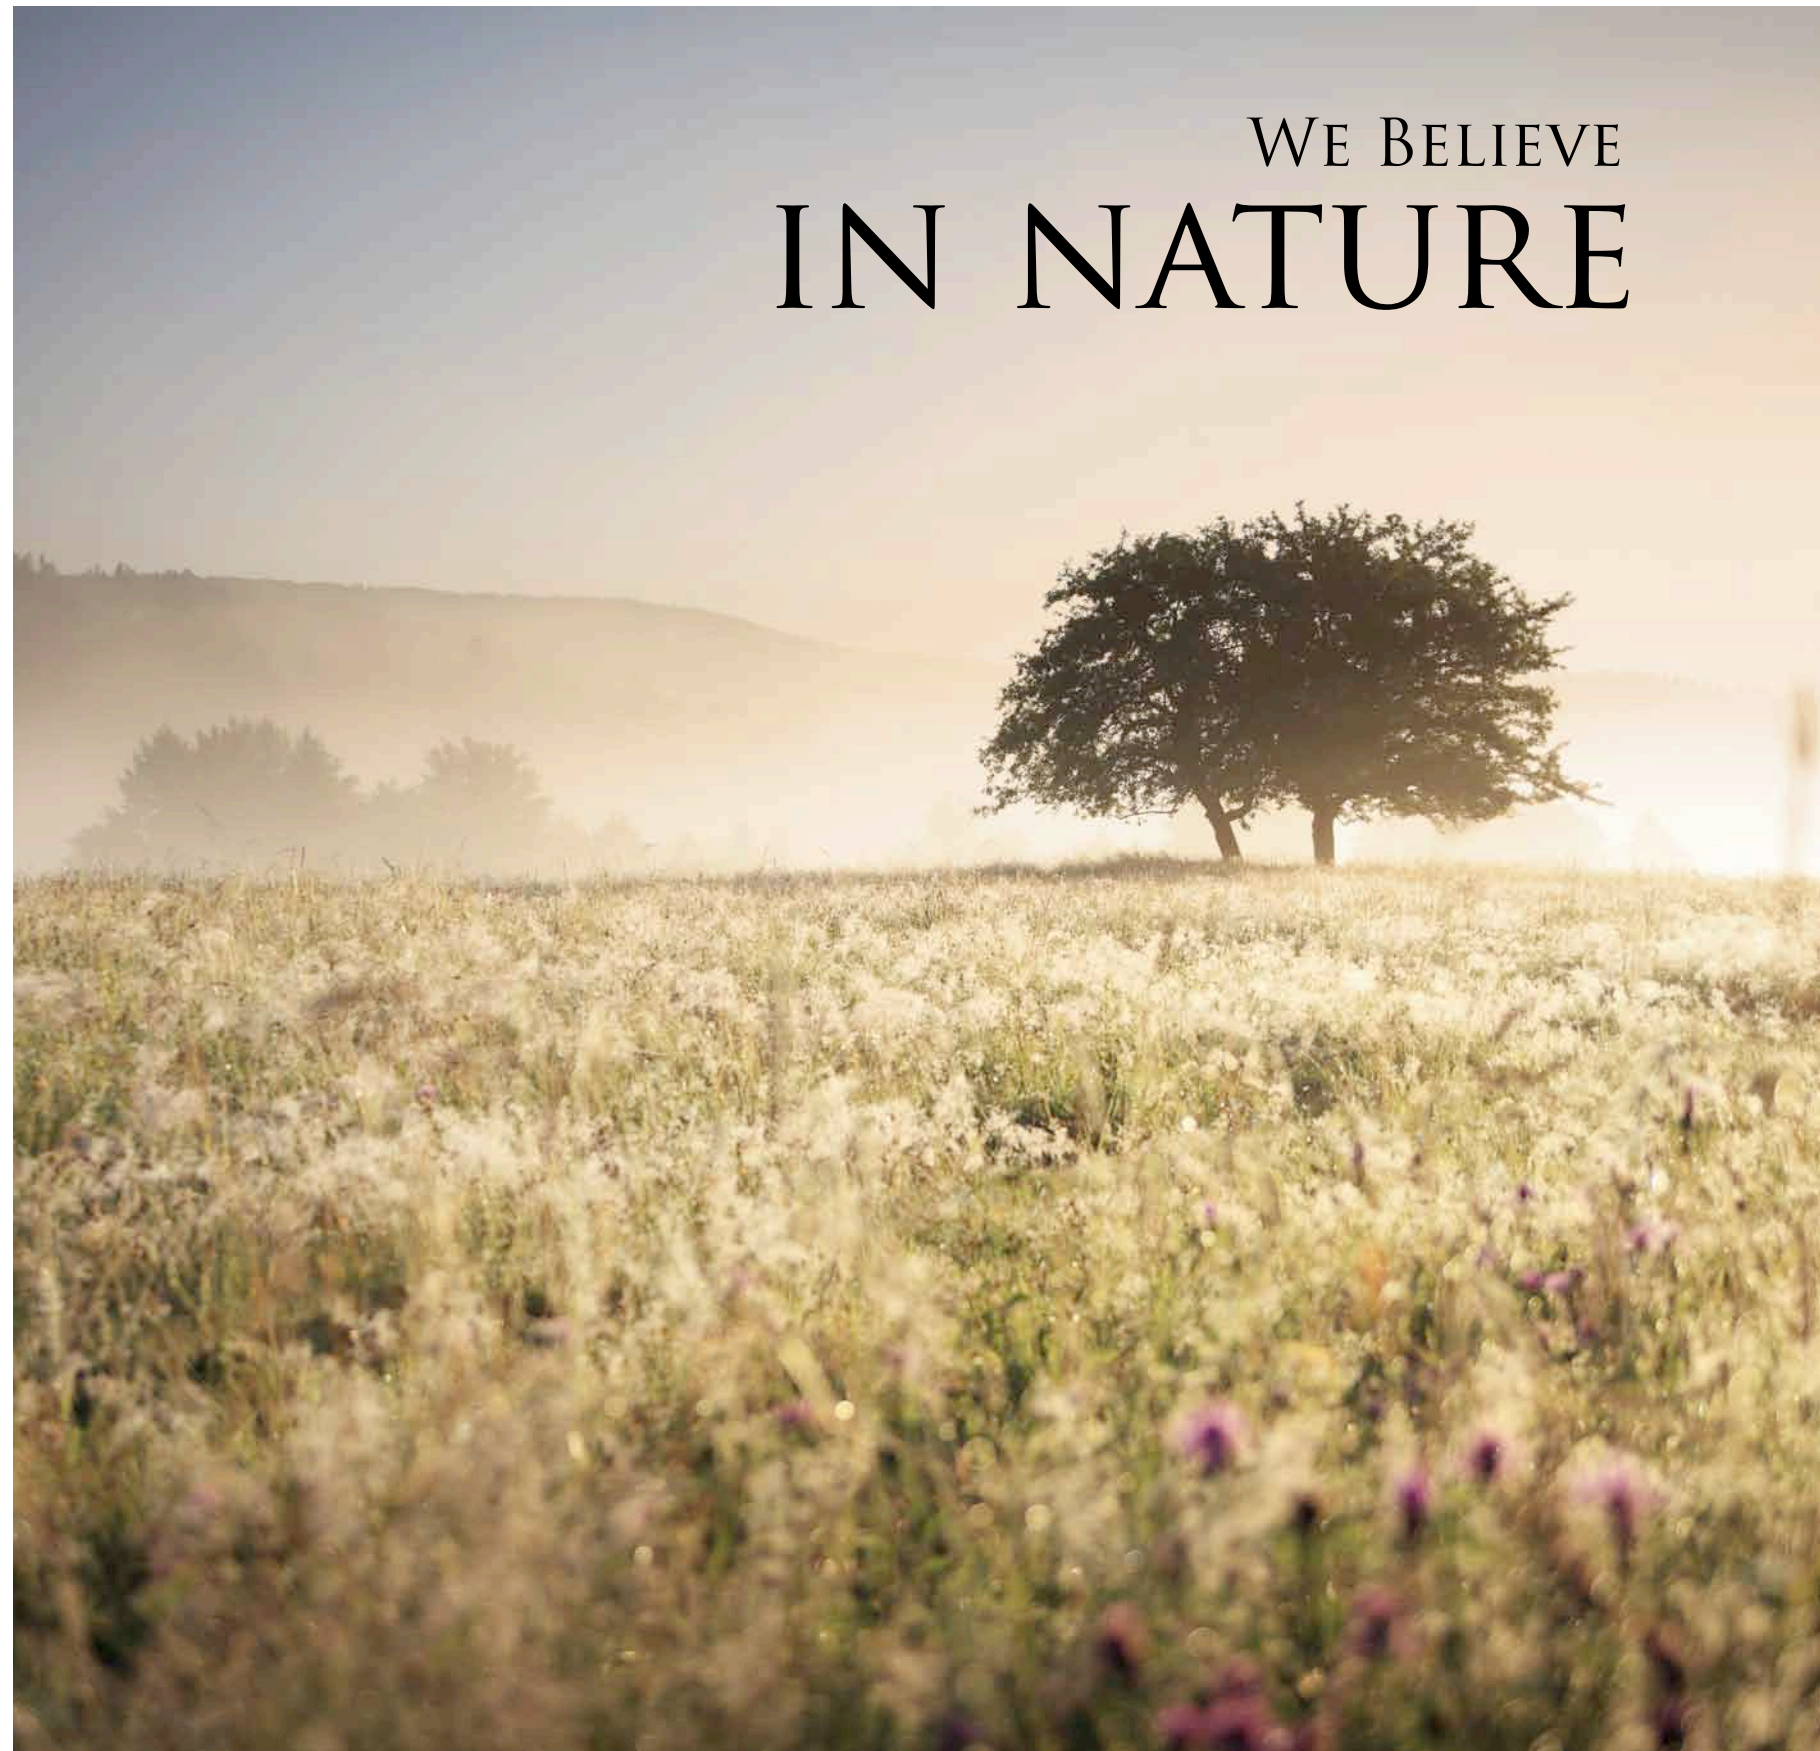

The uniqueness of our products, resulting from the cutting-edge technologies and highly qualified staff made us an important manufacturer. It has been proved by a number of contracts with both local and foreign partners. We supply our products to most European countries. For the last twenty years we have been employing more people in our experts’ team. At the moment there are over 100 people working for us.

Since the very beginning we have been regularly updating our offer including new products to meet requirements and expectations of all our customers. We follow current market trends and our designers set more and more ambitious standards by designing new own styles.

The exclusiveness of our products is commonly appreciated by our customers all over Europe. We have been a reliable partner for years and we sincerely hope to become yours, too.

We manufacture furniture for bars, restaurants, pubs and individual customers. We are open for new ideas and keen on challenges. Our customers have dreams, we make them come true. This catalogue contains our regular offer. Let’s do business together!

WE BELIEVE
IN NATURE

CARING ABOUT THE ENVIRONMENT

The basic material we use to produce our furniture is black locust wood, acquired and processed in accordance with all the standards and regulations of the Forest Stewardship Council.

Out of concern for the environment, we make sure that all of our products have a certificate from the FSC®, which promotes responsible forestry.

We guarantee our clients that the wood we use to make our products does not come from:

- forest areas where tradition or civil rights are violated
- forest areas of special environmental value
- genetically modified trees
- illegal felling
- natural forests converted into fields or any non-forestry purpose
- areas cultivated with dangerous chemical fertilizers

By using the FSC logo we make a commitment to the rights of the workers and to the welfare of local communities.

The mark of
responsible forestry

By choosing our products you lend support to extensive environmental protection programmes aimed at countering illegal overfelling, which impoverishes biodiversity of forestial ecosystems around the world.

Each time you buy a product with an FSC certificate, you support responsible forestry. You know that your purchase will not cause harm to the world's forests or support companies which violate human rights.

Your choice matters...

WHAT IS OUR SECRET?

All our furniture is made of black locust. It is often commonly but erroneously called acacia (or erroneously associated with Vietnamese acacia). Its wood is extremely resistant to changing weather conditions, so typical for our climate zone. Wood hardness is along with thickness one of the most important features of wood. Black locust is considered as ,very hard' wood

Category	Hardness	Scope kG/cm2	Scope MPa	Example species
1	very soft wood	fewer than 350	fewer than 34,4	asp, poplar, willow, spruce, fir
2	soft wood	350-500	34,3-49	lime, pine, birch,
3	moderately hard wood	500-650	49-63,7	oak, elm, chestnut
4	hard wood	650-1000	63,7-98,1	ash, jatoba, teak
5	very hard wood	1000-1500	98,1-147,1	black locust (robinia), rosewood, yew, hornbeam
6	bone-hard wood	more than 1500	more than 147,1	ebony, coconut

Wood hardness classification according to.. Source: wikipedia

Because of its features, black locust wood is used for building bridges, playgrounds, posts and sport equipment. Robinia (black locust) trees provide very valuable wood – light in colour and weight, hard and resistant to rotting. The beautiful and warm colour of black locust wood ideally matches the full of green garden scenery.

Such additional components of black locust as tanners, rubbers, resins and essential oils improve wood resistance. Tanners are natural preservatives which prevent it from rotting. Others, e.g. resin compounds, are a kind of mechanical barrier which stop mould from spreading in the wood.

But it's not everything. Thanks to impregnation (using oil- and wax-based substance) you can also enjoy the ideal look of the furniture for a long time, without bothering about time-consuming maintenance or losing the original look. Such substance not only protects our furniture, but it also shows up the natural beauty of black locust.

We guarantee top quality of our products and we hope that you will share the satisfaction of our numerous customers.

ABOUT DESIGN

Rondo furniture is the essence of modern and innovative technology as well as fine and skilful craft. It is a combination of subtle chic and intriguing, sophisticated design.

Unique, elegant and timeless design

Our furniture will become a priceless element of the décor of your living room, terrace or garden. Large and comfortable places to relax will also add some dignity and formality to every kind of interior. Solid constructions create representative and at the same time calm and relaxing places. All our collections are easily distinguishable because of their interesting and elegant style. They are toned down and subtle, and at the same time comfortable, functional and practical. But we design our furniture also bearing in mind their price, endurance so that they can be easily maintained and used for many years. Our offer has got something for everyone. Those who are keen on simplicity as well as more romantic souls. Let us offer garden and terrace furniture, hotel and bar sets as well as swimming-pool ones. With the variety of our offer we try to meet the expectations of different needs, tastes and dreams. People who want to live a pleasant life in a beautiful place.

Each collection can be accompanied with some practical accessories including deckchairs, cocktail cabinets, footrests or cushion cabinets.

The most durable materials and innovative technological solutions.

We have built our strong position on the market manufacturing solid and durable furniture. As we aim at customer's satisfaction. RONDO always selects best materials: European wood: black locust, light and durable aluminium framework together with carefully forged, durable metal constructions. Our designers and technology experts cooperate with the suppliers and also rely on the opinion of each customer to manufacture top-quality products. We develop manufacturing methods which are more effective and innovative, and the materials we use surprise with their look and endurance. Rondo collections are a genuine prestige in your garden, living room or on your terrace. They will excite all exclusive design lovers. We believe that you will share the satisfaction of the thousands of our customers.

Verona

Enviably style. Unbeatable comfort

Muted surrounding, simplicity, a place to rest. Or maybe a variety of colours, beautiful materials, glitter and luxury? Both sceneries will make a perfect background for Verona collection.

A unique shape, being a combination of the juicy modern with the smashing retro style, brought about an impressive effect. Thanks to innovative approach and design closed in its form, our collection of sofas sets a new trend in garden furniture design.

Verona offers a tasteful elegance, comfort, extraordinary style and climate.

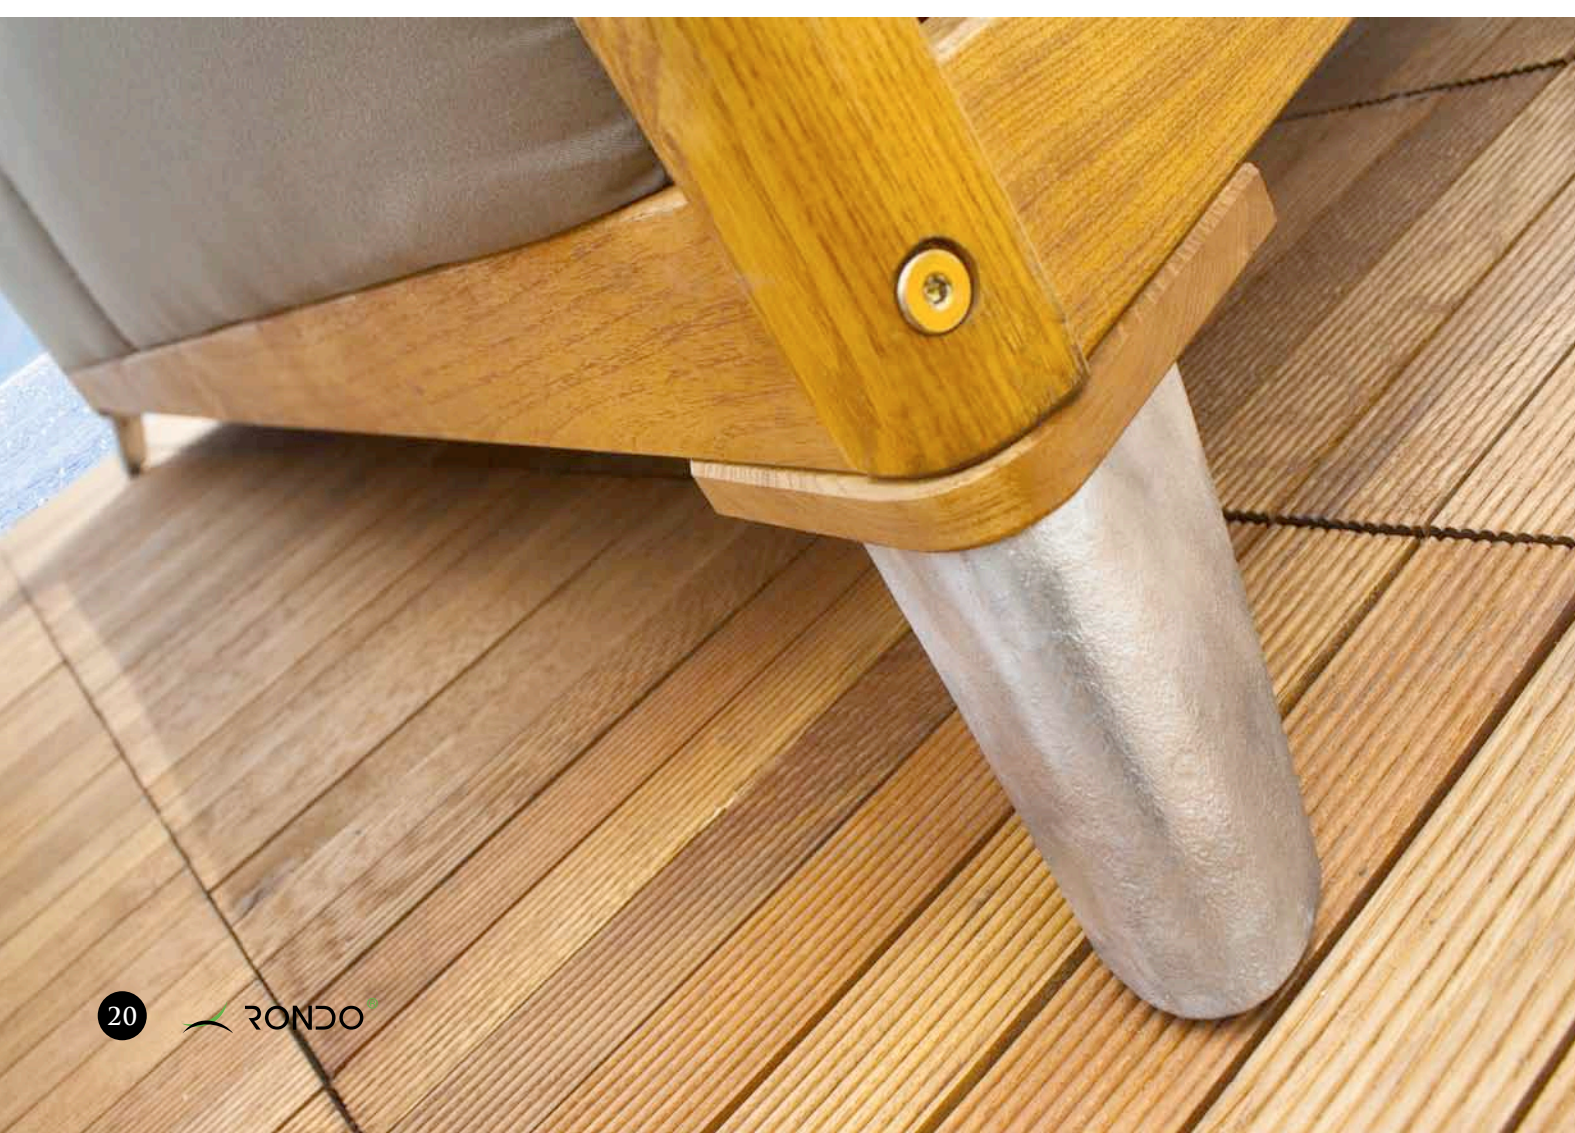

It impresses with its uncommon line giving the place a character.

It will become an excellent ornament in a tasteful living room, a modern hotel or on a comfortable terrace.

Verona is a collection for all moods. Excellent for a party with your friends and for a cold drink.

And for all kinds of weather. Thanks to modern materials and careful finishing we came up with lounge furniture design combined with the resistance of garden furniture. In one piece.

TOSCANIA

Imagine a combination of timeless elegance with refreshing modernity. Imagine a sophisticated design that comes together with unbelievable comfort. Imagine Toscania...

Thanks to a unique composition – powder-painted aluminium, with large, shaped, pastel cushions – the collection perfectly reflects the newest trends. Toscania will add style and charm to unique hotels, sophisticated restaurants, peculiar gardens and terraces.

Progressive stylistics will grant beautiful houses, residential lofts and apartments with new character. Simple, geometrical shape, together with soft, comfortable places to rest, highlight the magnificence of the collection. On the other hand, the Toscania set will perfectly highlight modern architecture.

SLIM

Batyline resilience. Black and white. Durable, solid and stained wood. Modernity. Slenderness. Uniqueness. Let us introduce Slim... The collection offers unusual among garden furniture design. Modelled seats were shaped to look extraordinary but simple, and first of all really slender.

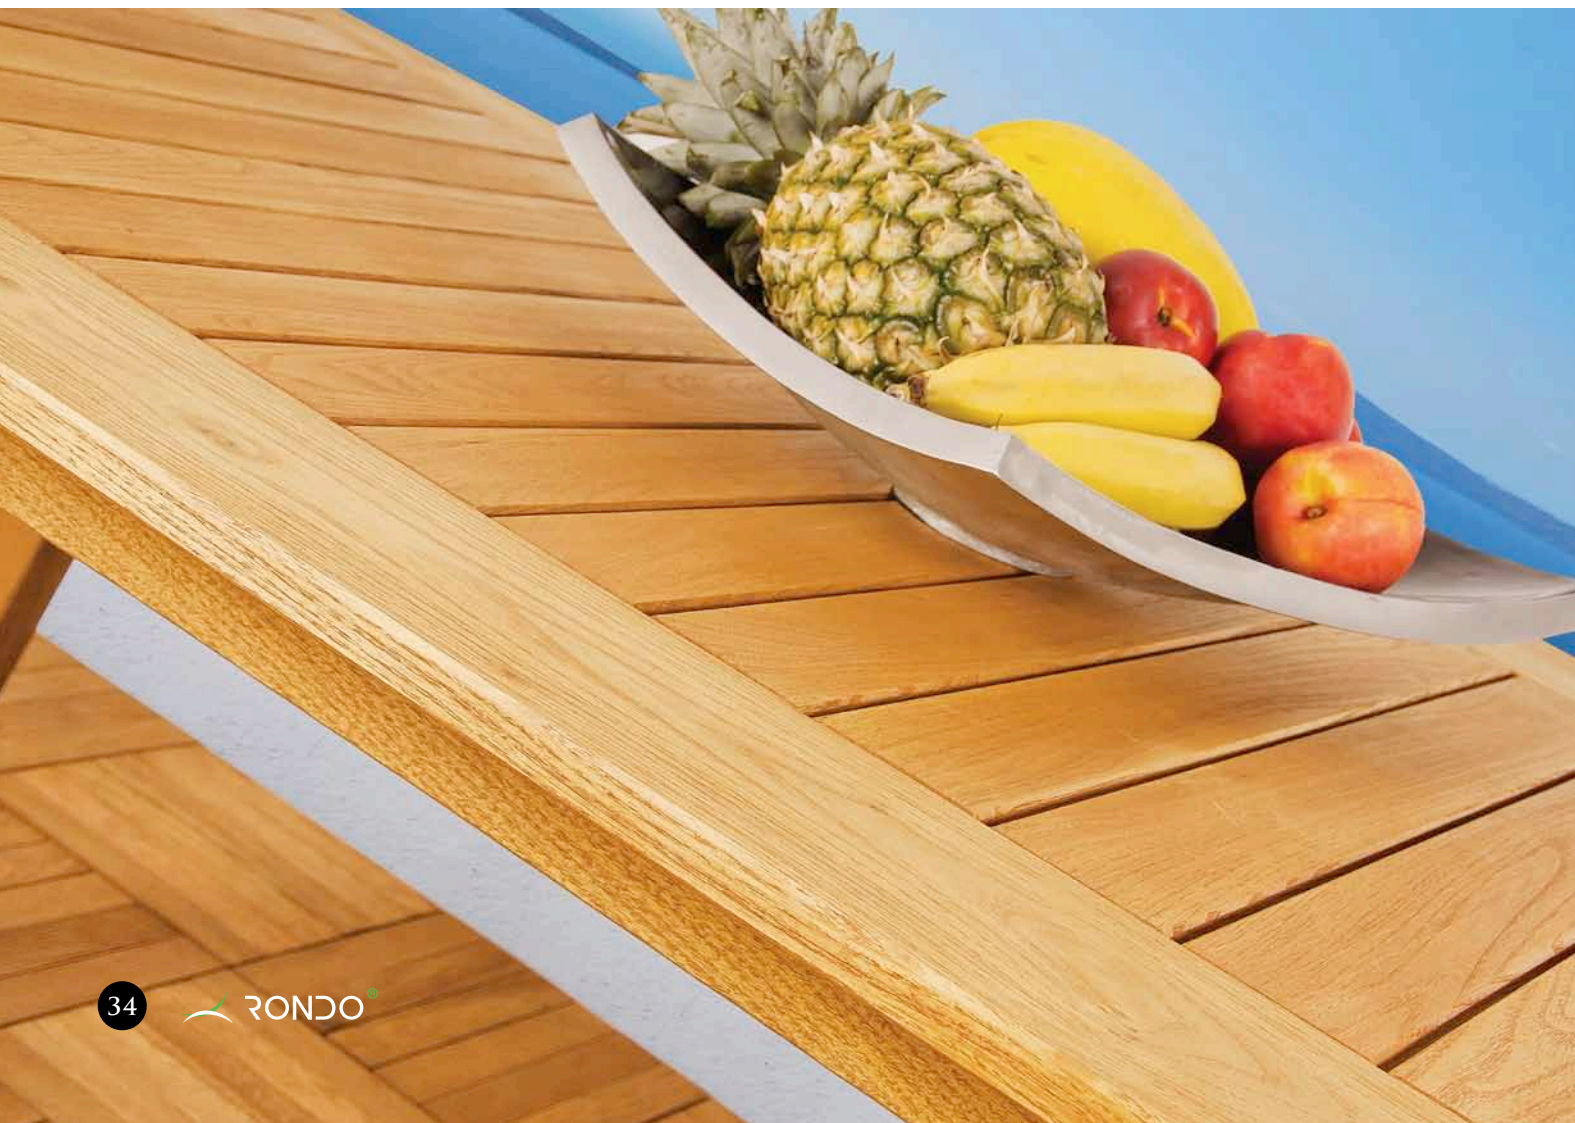

The delicate shape of the armchair is filled with a material covering the armchair, Batyline, which is a polyester fibre grid, coated with PVC. It provides excellent dimension stability. Even after a long period of using it it remains the same when it comes to both shape and ideal smoothness. It is also resistant to unfavourable weather conditions. Beautiful and modern – this collection will certainly make your garden, terrace or living-room more attractive. It looks unbelievably great in a modern dining room or kitchen. This style will match almost any place.

Thanks to ergonomic elements the armchairs offer not only unique design but also real comfort.

Soft Batyline makes cushions redundant and also reduces the weight of the furniture. They are also easy to store as they can be put one on another. The whole is complete thanks to solid frame made of hard reliable acacia wood to satisfy even the most demanding customers and at the same time make the furniture more varied. The top of the table was made in a very minimalist way. Two side strip-woods are joined with a row of short simple cross-bars. Bow-bent legs are an extinguishing feature.

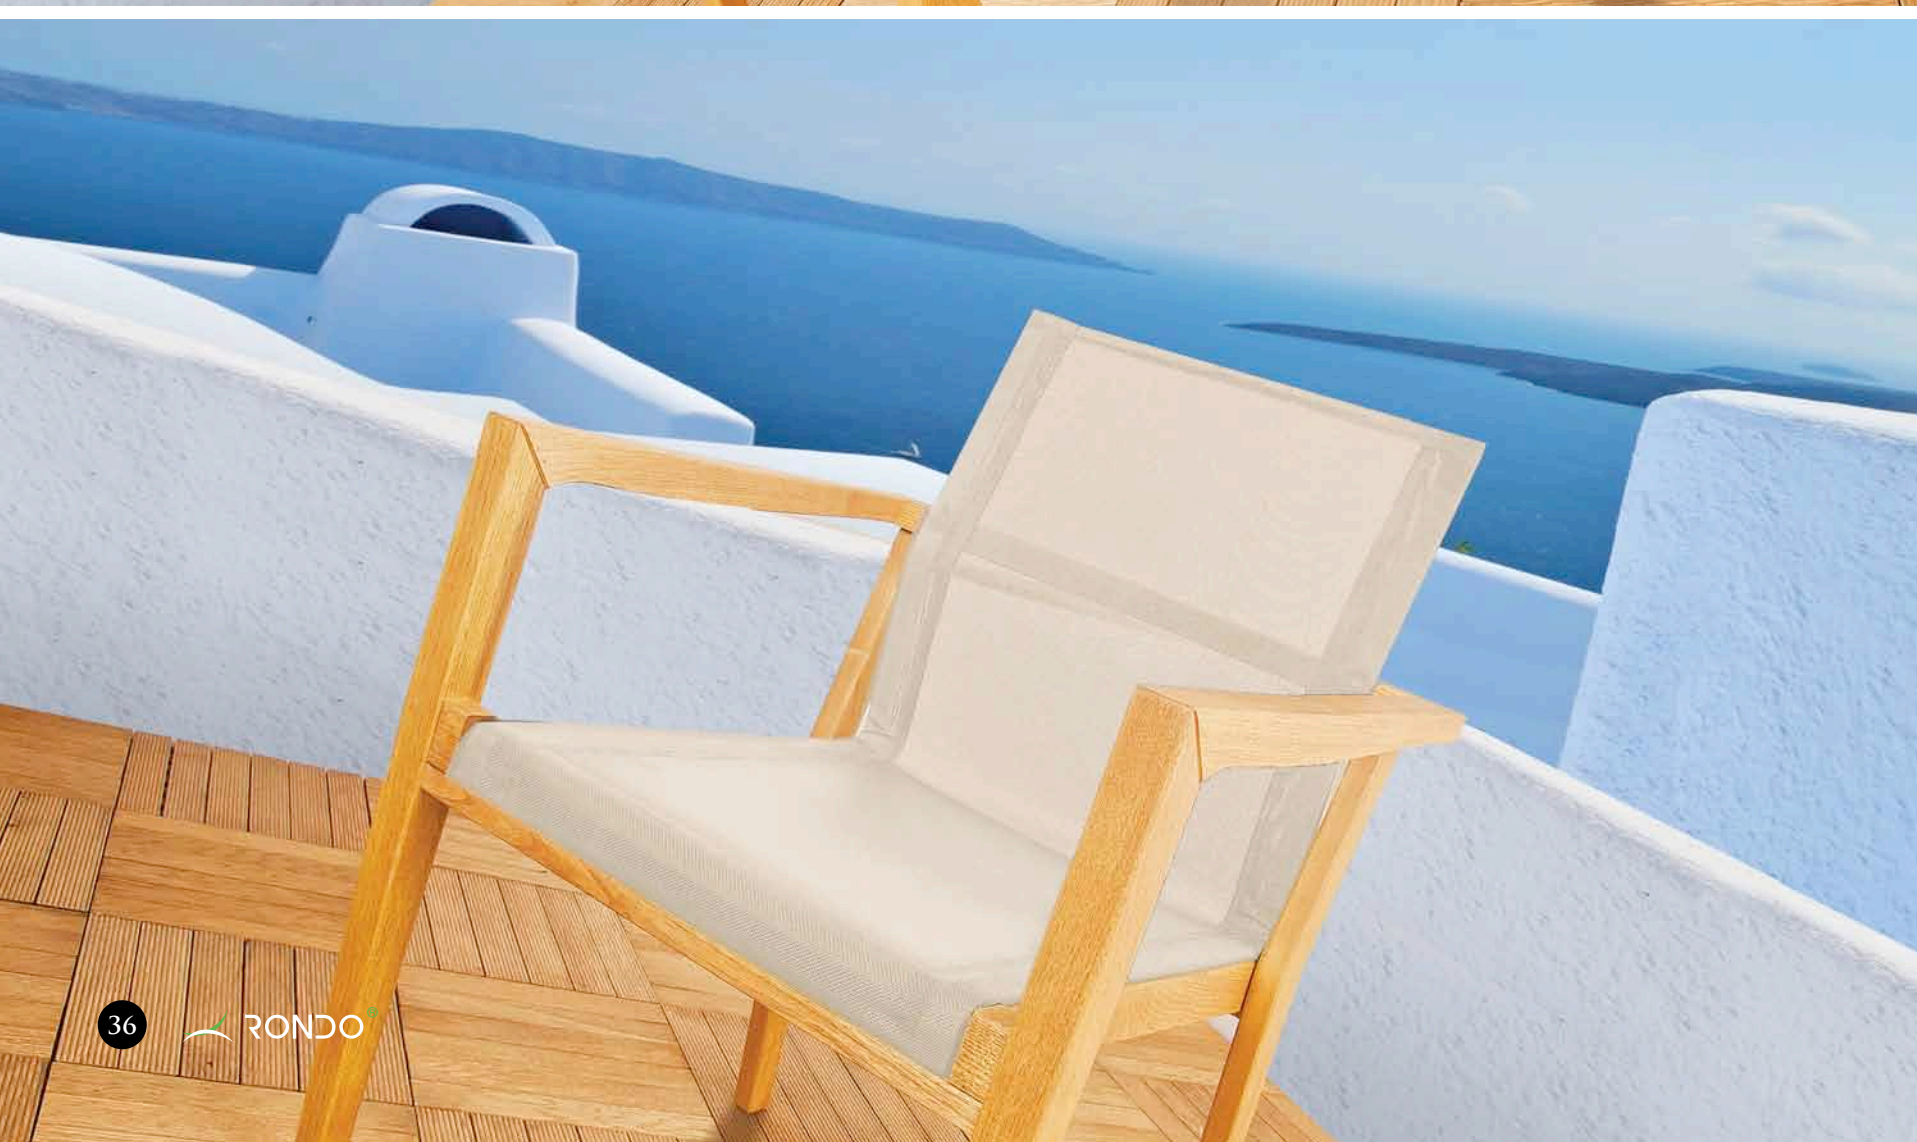

The play of colours: totally trendy piano black or timeless Arctic white, supplemented with the juicy tone of black locust wood. Excellent also in brave arrangements. Slim surprises with its detail-deprived form. A sophisticated, slightly minimalist style makes this collection a genuine piece of art.

GALAXY

Comfortable relaxation, fantastic design and unshaken quality – these are the main features of Galaxy group. Sit in this armchair and everything will be so clear. This is an ideal set for any occasion.

We clashed the ageless classics of garden furniture with some intriguing modern design. And we hit the bingo! Not only did we get a fantastic fresh style, but also one of the most comfortable collection of garden furniture.

To make timeless chairs even more interesting, we gave them unusual profile. They are unusually comfortable. Both a coffee with friends and a lengthy business meeting are just as comfortable – as long as you have Galaxy. The table was rounded and its outline was smoothed. Its top is fixed on slender frame and reliable legs. Hard and solid black locust wood makes this set a purchase for a long, long time.

MILANO

The most comfortable garden furniture ever.

Can garden furniture be as cosy and spacious as, for example, your favourite living-room armchair? From now on they can! The combination of Black Locust wood with great soft cushions makes an ideal couple. Come and sit, feel at home and you will love the group. It's beautiful and minimalist but this is just the beginning.

The collection includes all the best regarding garden furniture – beautiful, durable and first of all natural material: black locust wood. This, along with cutting-edge technologies we use to produce the cushions (high temperature foam, a patented material – dralon nad teflone-impregnated fabrics) gives you an ideal piece of furniture. Comfortable, spacious and in your favourite colour. You can choose from a number of pastel as well as more vivid upholstery. Milano gives you an unlimited number of arrangement options. Thanks to symmetric shapes and modular system you have full freedom of creation. Both on a small area and on a huge patio.

MILANO set looks perfect in gardens, stylish terraces, in hotels and restaurants. It looks good both outside and in a modern apartment so... I guess you already know where you will put it when it gets colder outside?

MAJA

MAJA is a line of beautiful, comfortable and functional furniture for your garden!

It will accentuate the stylishness of your garden, terrace or balcony. Its classic style imbues your surroundings with the spirit of the old days. Metal elements – hand-forged by blacksmiths – show their beauty and strength, but also typical black locust lightness.

MAJA furniture will revolutionize your garden! The wide array of products – tables, chairs, benches – goes beyond a mere family barbecue or a meeting with friends.

Elegance and comfort of MAJA furniture in the privacy of your garden makes for a perfect setting for conversing with your close ones, meeting your clients or enjoying a book.

MAJA is a perfect set for the garden, terrace or balcony!

Why wait any longer?
Make your dreams come true
and enjoy MAJA furniture!

London collection is a fresh approach to classical and timeless garden design. Inspired by sunny Crete we equipped this collection with beautiful light frame of calcareous white. Backrests and seats became more subtle thanks to applying alternative type of screws hidden in the back of the frame. A delicate glittering colour gives the gently bent metal shapes a totally new look. In spite of solid metal construction the furniture look light and delicate.

Powder-coated frame guarantees top resistance to external factors. Hard black-locust wood is the best possible choice to produce reliable furniture and its honey colour ideally corresponds to the bright metal.

This style has got a lot of faces. It perfectly matches a garden surrounding, a romantic manor house as well as a bright terrace in pastel colours. It will ideally tone down a garden full of flowers or match light and clear design.

Our Maja and London collections enjoy a great popularity with pubs and restaurants. Thanks to their solid construction they can endure hard everyday work and, as they fold easily, their storage is not a problem at all.

GIVE YOURSELF A LITTLE
PLEASURE

CREATED FOR FURNITURE. READY FOR EVERYTHING.

Make the fine even more wonderful. This is the task our accessories, as our additional offer, have to face

Joy for the eye. And the body.

The materials used for cushion production were selected to give you the sense of luxury and comfort. They ideally match all the furniture, and the covering fabric, Sunbrella® or Dralon®, are 100% acrylic fibre. This durable and functional fabrics are excellent material for outdoor furniture. Unlike most of manufacturers, we additionally waterproof them with Teflon so that they are more resistant to rain, dirt and temperature.

The extraordinary softness of our cushions comes from special polymer and neoprene fillings. They are soft and at the same time bounce – sitting in such an armchair or on a sofa with such filling you can feel the seat gently matches your weight. A patented channel system removes water from the cushions, so even after a heavy rainfall they are ready to be used.

The play of colours

Totally trendy piano black or timeless Arctic white. Or maybe juicy red or electric blue? Our palette of colours has something for everybody. Both calm and vivid fabrics. We also offer a variety of materials, from delicate natural cotton to all achievements of textile industry including Sunbrella®, Dralon® and Batyline®.

Accessories of great importance

Our ACCESSORIES section also offers furniture supplementing our collections. Our couches – huge and comfortable – are some of the most spacious available on the market. They are also practical – they have wheels which help to move them around easily. Deckchair got a comfortable footrest, wide and comfortable armrests as well as graded bending adjustment. It's folding and also has wheels – using it is nothing but pleasure. Practical and elegant box for storing cushions, garden and grill accessories has pneumatic lifts to open and close gently and safely. We also offer a rocking chair and black locust floor systems. Enchant your garden with our accessories!

Spa, Poland

MATERIALS USED

We select our materials with utmost care. We look not only for good appearance, but also for quality and robustness. There are most popular:

WOOD

Black locust (Robinia) commonly called acacia. This fast growing tree makes a very handsome furniture material, shows excellent hardness, and is extremely resistant to decay. Robinia is a first resistance class wood along with the most valuable European timbers. These qualities make it extremely versatile for exclusive outdoor furniture. All the wood used in the manufacture of our furniture is sourced from Europe and is 100% FSC certificated.

BATYLINE

Batyline is a PCV-coated netting based on polyester fibre. It ensures excellent fiber stability. The material stays perfectly smooth even after extended use.

Batyline is characterized by:

- resistance to UV rays
- resistance to mould and microorganisms
- resistance to tearing
- easiness of preservation
- good ventilation
- elasticity

STEEL

Used in the production of frames. Because of its high mechanical endurance it performs well in very busy places. Metal frame furniture are usually found in hotels, restaurants and buildings of historical value.

ALUMINIUM

Aluminium used in the production of frames is characterized by:

- resistance to UV rays
- resistance to dampness, microorganisms and corrosion
- easy maintenance – it is smooth and shiny and does not gather dust or sand
- is safe and non-flammable
- is very durable and does not break
- is environment-friendly and qualifies for low-cost recycling
- is very light
- has a modern appearance

HPL

- resistance to UV rays
- resistance to dampness, microorganisms and corrosion
- easy maintenance – it is smooth and shiny and does not gather dust or sand
- is safe and non-flammable
- is very durable and does not break
- is environment-friendly and qualifies for low-cost recycling
- is very light
- has a modern appearance

CUSHIONS: SUNBRELLA® OR DRALON®

- the fabric is 100 % acrylic
- filled with 6-20 centimeter compact foam
- additionally, the material is impregnated with Teflon, which increases resistance to damp and dirt
- the cushions have an adjustable headrest and a zipper (for removing and washing the cover)

FINISHING

We know about the power of detail. That is why we pay close attention to every stage of furniture production and we continuously strive to improve our technology. Here are some reasons why our furniture beats the competition:

POWDER COATING

Powder coating is a technology in which metal elements are covered with powder paint and the surface is hardened afterwards. Elements painted with such method are characterized by high resistance to corrosion and pleasant appearance that lasts for long.

Powder paint is safe and environment-friendly, it is certified and can come into contact with food and potable water. No harmful solvents are used in the painting process. The paint is applied once and the thickness of the layer corresponds to three layers of solvent-borne paint. No harmful substances are discharged while the coating hardens.

TWO-STAGE SANDING

Why is our furniture so smooth? Unlike our competitors, we sand our furniture by machine, but also manually. That is how we obtain ideal smoothness – and we don't have to worry that our child will get hurt while playing in the garden.

VARNISH

The unique composition of our varnish is based on a formula which mixes oil and wax. Such a weatherproof layer not only protects and preserves our furniture but also reveals the beauty of the structure of our natural Black Locust wood.

WROUGHT FRAME

We run our own metalwork shop where we make frames that are later used in the production of our furniture. We forge and bend them manually to add character and individual appearance.

PACKING

Each piece of our furniture is packed separately in a durable multi-cardboard box so as to assure safe delivery all the way to your garden.
