

The sunny side of shadows.

Glatz
Shade in Swiss Quality

UV protection

The fabric collection by Glatz offers protection against the harmful UV rays (Australian Standard UPF 50+).

Variety

Be it a garden sunshade or a giant sunshade, with centre or side pole, Glatz has always the right answer for you.

Light fastness

Fabrics fade in the sunlight. That's the reason why Glatz recommends the use of fabrics offering a light fastness as high as 6 to 8 (very good to outstanding).

**Even a sunshade never stands still.
Sunshades by Glatz never do!**

Glatz attaches the greatest importance to research and development for continuous change and learning. All these efforts make it possible to support the manufacturing processes at all times with the newest findings, technologies and materials.

The Pendalex P+ is just one of the revolutionary Glatz products. A new ergonomic concept and the selection of matching materials have made it still more attractive. At the same time, it has been possible to build a still stronger structure. And quite a number of additional operational features are now available.

So, the Glatz assortment turns out to be something really special that makes outdoor living still more enjoyable. Optional accessories such as lighting and heating, last in sequence but not in importance, and a lot more make you feel even more comfortable.

Sunwing® C+

The Sunwing C+ free-arm sunshade offers lots of space under its canopy. It's packed with ergonomic features and respects the natural path of movement of the human body. Its design without flounces gives the Sunwing C+ a modern look.

- self-locking crank drive and integrated tilting rod
- canopy inclination up to 90° (on both sides)
- Sizes: Ø 265, Ø 300, Ø 330, 260 x 260 cm

Sombrano®

It's so easy to open a giant sunshade. It needs nothing more than a few crank rotations to open the canopy. And by means of the tilting rod it is possible to manoeuvre it into the wanted inclination. Thanks to its turnable ball-bearing foot pedal it turns around by 360°.

- it opens easily, also above the tables
- with its backward tilted pole, it offers still more space
- Sizes: Ø 350, Ø 400, 300 x 300, 350 x 350 cm

Pendalex® P+

The Pendalex P+ boasts a tough construction and a high degree of user comfort. The sunshade can be turned and tilted in an easy and comfortable way according to the sun's position. It's also a perfect shield against curious eyes. The closed sunshade requires only little space.

- stepless tilting of the sunshade canopy in all directions up to 90°
- easy height adjustment powered by means of a gas pressure spring (50 cm lift)
- ergonomic operation, crank for left- and right-handers
- Sizes: Ø 300, Ø 325, Ø 350, 285 x 230 cm

Pendalex® V+

With its generous dimensions and unrivalled flexibility, the Pendalex V+ offers plenty of shade and a sun protection factor of UPF 50+. You can turn, incline or tilt the sunshade canopy in a stepless way with just one simple hand movement.

- easy height adjustment powered by an integrated gas pressure spring
- the sunshade canopy can be perfectly adjusted according to the sun's position
- Sizes: Ø 250, Ø 300, Ø 325, 280 x 240, 260 x 200 cm

Alu-Push

The aluminium sunshades by Glatz offer a fast and simple operating system. With their practical dimensions, they are the ideal solution for smaller areas. But they are grand if one takes their performances into account. They offer sun protection according to the Australian Standard and a user comfort that will make you feel happy for a long time.

- Alu-Twist with crank drive; stepless tilting
- Alu-Push with stepless height adjustment and tilt joint
- Alu-Style with wind vent
- Sizes: from 200 to 330 cm, round, square and rectangular

Alu-Twist

Fortino

Fortero

Fortino and Fortero, conceived for the demanding user, fulfill high criteria. They are user friendly, strong and resistant and still extremely attractive. Their well balanced price/performance ratio makes them even more valuable.

- the tension lever and the counter-rotating servo principle allow for easy opening
- smart construction and tough materials: The frame is of aluminium, the crown and the slide with tension lever are of die cast aluminium
- Sizes Fortino: Ø 250, Ø 270, Ø 300, 240 x 240 cm
Fortero: Ø 350, Ø 400, 300 x 300, 350 x 350 cm
